12th January 2021

Attention: Gus Wigley (Inglewood Stud)

Horse: Green Roller_War Decree'19 Lot 429

The above-mentioned horse was examined by myself on the 11th of January, 2021 at Inglewood Stud, Ohoka, North Canterbury. A veterinary examination was requested by Inglewood Stud to help mitigate concerns veterinarians and purchasers may have due to the inability to personally view horses. The following observations were made:

Approximate height – 14.3 ½ hh.

Ocular examination with light – no abnormalities detected (a full ophthalmoscopic examination was not performed).

Oral examination – no abnormalities detected (performed without a mouth gag).

Cardiac auscultation – no abnormalities detected.

Limb examination – no joint effusion, swelling or heat were detected on any limb.

There was an abscess in the submandibular space, near the caudal angle of the right mandible, which has been cultured (actinobacillosis) and treated appropriately. The abscess is healing as to be expected. There were no health concerns. No abnormalities were detected at walk.

If you have any further queries, please do not hesitate to contact me.

Yours faithfully,

Dr Krystal Grant B.V.S.c B.S.c
Equine Veterinarian
Rangiora Vet Centre
