**Veterinary Report : Verdi-Alesio 2019, a Thoroughbred colt,
Owned by Long Acres Stud, 111 Pinegrove Road
Long Acres Stud
R D 1
DARFIELD, 7571.**

Surgical Procedure: On **29.10.2020** A standard approach was made to the dorsal aspect (front) of the right front fetlock joint. Small osteochondral fragments were removed from the joint. The cartilage health within the joint was good. The joint was flushed and then the portals were sutured closed and the joints were bandaged. Recovery from anaesthesia was good.

The prognosis would be considered good and it would not be anticipated that there would be any problems associated with the chips.
