**VETERINARY REPORT**

This report and findings contained herein are solely for the addressee and may not be used or relied upon by any other person entity without the express written consent of Dr C G Lawler BVSc & Associates. The interpretation of radiography and/or video endoscopy findings may vary with the examiner, method of examination and a horse's changing condition. This is a report of the undersigned's findings on the date indicated. This report is limited to the findings contained herein and no other findings or opinions should be inferred beyond those expressly set forth herein. This report does not constitute a warranty or guarantee of any kind by Dr C G Lawler BVSc & Associates.

Lot: 23

Horse: Showcasing x Plenteous

Signalment: Chestnut two-year old colt Left = HF conjoined Right = 50 over 8

Sale: New Zealand Bloodstock Ready to Run Sale, November 2020

Vendor: Lilywhites Lodge

Requester: Ms Shannon Taylor

Radiographer: NZ Veterinary Associates Equine -

Left Fore Hoof: No significant findings.

Left Fore Fetlock: No significant findings.

Left Fore Knee: There is a discreet area of osteolysis on the distal border of the radiocarpal bone.

Right Fore Hoof: No significant findings.

Right Fore Fetlock: No significant findings.

Right Fore Knee: No significant findings.

Left Hind Fetlock: No significant findings.

Left Hind Hock: No significant findings.

Left Hind Stifle: No significant findings.

Right Hind Fetlock: No significant findings.

Right Hind Hock: There is mild remodelling on the dorsoproximal border of the cannon bone in the tarsometatarsal joint.

Right Hind Stifle: No significant findings.

Comment: Rating this horse as a low, moderate or high risk to develop lameness in one of the radiographed joints or areas I would rate this horse as **low** risk.

Yours sincerely,

Dr Chris Lawler BVSc

Video Endoscopy: An examination of the video endoscopy performed by Dr Neil Houston of NZ Veterinary Associates Equine on the 13/11/20 revealed the horse to be displaying Lane **grade 1** laryngeal function which is normal. No abnormalities were detected.

The microchip designated in the recording was 985125000113003.

Yours sincerely,

Dr Chris Lawler BVSc
