### **VETERINARY X RAY REPORT**

Re: 20RTR Lot 0082 Shocking – Suad'18  
Microchip: 985125000106362

Freeze brands: near sh: **HF** conjoined  
Off Sh: **121**over **8**

I have reviewed these X Rays dated 20 October 2020  
They were of a standard sales series 36 views.

#### **Radiographic findings:**

There is a small round lucency in the 'transitional zone' of the medial sesamoid of the left fore fetlock. This is unlikely to be of clinical significance.

There were no other significant radiographic changes noted.

Neil Houston BVScMACVSc

This report and the findings contained herein are solely for the addressee and may not be used or relied upon by any other person or entity without the express written consent of Veterinary Associates Equine and Farm Ltd. The interpretation of radiographs and findings may vary with the examiner, method of examination and a horse's changing condition. This is a report of the undersigned's findings on the date indicated.

This report is limited to the findings contained herein and no other findings or opinions should be inferred beyond those expressly set forth herein.

This report does not constitute a warranty or guarantee of any kind.

## **VETERINARY ENDOSCOPE REPORT**

At the request of Mark Chitty I performed an endoscopic examination on the below described horse at Haunui Farm.

Re: 20RTR-0082 **Shocking - Suad '18**

Microchip: 985125000106363

Near Side Brands: **HF** conjoined

Off Side Brands: **121** over **8**

### **Endoscopic Examination and opinion thereof:**

An endoscopic examination of the laryngopharyngeal area was performed at rest.

The arytenoids were synchronous in their movements and full abduction was easily achieved (Lane Grade I). This finding is within normal limits.

No abnormalities were noted and the horse complies with Para 3.6 of the 2020 RTR conditions of sale

Veterinarians Name: -N E Houston BVSc. MACVSc.

Signature: -. 

Date of Examination: 13 November 2020
