PREGNANCY EXAMINATION CERTIFICATE

Mare presented as Assume
Breed Thoroughbred
Colour Brown Brands WS $\frac{111}{2}$

On this day, following an ultrasound scan, I found the above mare in foal / empty consistent with approximately 30/9/22 days gestation. WS

Place of examination: Little Arundale Sld, Merton

Signed: Sharon Dillstone Date: 12-6-22

233 State Hwy 1, Bulls. Ph: 06 3222333 Fax: 06 3222033 Email: office@equivetsnz.co.nz

Ultrasound examinations to detect the presence of twin/multiple pregnancies are common veterinary procedures at breeding. In certain cases, due to age of pregnancy or positioning within the uterus, it is not always possible to detect twin pregnancies. Repeat examinations are recommended to minimise the risk of not detecting twins.
