Place of examination: Little Aardale St, Martinton

Signed: Orlando Illston Date: 12-6-23

233 State Hwy 1, Bulls. Ph: 06 3222333 Fax: 06 3222033 Email: office@equivetsnz.co.nz

Ultrasound examinations to detect the presence of twin/multiple pregnancies are common veterinary procedures at breeding. In certain cases, due to age of pregnancy or positioning within the uterus, it is not always possible to detect twin pregnancies. Repeat examinations are recommended to minimise the risk of not detecting twins.
