

REPRODUCTIVE EXAMINATION OF A BROODMARE

Mare's Name: **MONET**

COLOUR	BREED OR TYPE	SEX	AGE
Bay	Thoroughbred	Mare	5 years

Microchip: 985125000100161

Veterinary Clinical Findings:

The vulva was caslicked.

Ultrasound rectal examination showed a normal anestrus uterus with normal echogenicity. The ovaries appeared normal. The left ovary measured 4.5cm and the right ovary 5cm.

The mammary glands appeared and palpated normally.

This mare appears to be a suitable candidate for breeding.

Date and time of examination: 07:45am 30 May 2022
